Product overview

Name: Salubrinal
Cat No: HB0573
Short description: Selective elF2α dephosphorylation inhibitor
Biological description: Selective eukaryotic translation initiation factor 2 subunit α (elF2α) dephosphorylation inhibitor. Inhibits protein phosphatase 1 (PP1) action on elF2α without inhibiting dephosphorylation of other PP1 substrates. Inhibit herpes simplex virus replication and protects cells from apoptosis through endoplasmic reticulum stress. Shows potential neuroprotective actions.
Alternative names: eIF-2α Inhibitor
Biological action: Inhibitor
Purity: >99%

Properties

Chemical name: 3-Phenyl-N[2,2,2-trichloro-1-[[8-quinolinylamino]thioxomethyl]amino]ethyl]-2-propen amide
Molecular Weight: 479.81
Chemical structure:

![Chemical Structure Image]

Molecular Formula: C₂₁H₁₇N₄OŚCl₃
CAS Number: 405060-95-9

Storing and Using Your Product

Storage instructions: +4 °C
Solubility overview: soluble in DMSO (100mM)
Important: This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
